

RHINOX[®]
XTREME PERFORMANCE

MINI EXCAVATOR BUCKETS

The Rhinox compact range of buckets for machines from 0.75 ton up 8 ton have been designed and developed to meet the requirements of plant hire and groundwork companies.

Using hi-tech CAD design software we have worked to optimise strength and durability whilst applying state of the art manufacturing techniques to keep costs as low as possible.

TON KEY FEATURES ARE

- Heavy duty bossed hanger brackets to ensure maximum strength and wear resistance where the bucket mounts to the machine
- Bolt-on teeth and side cutters to allow for easy replacement when worn out
- Wear strips to rear of bucket to prevent the bucket shell wearing out
- Heavy duty bucket sides
- Teeth have lifetime guarantee against breakages

EXCAVATOR BUCKETS

0.75-8 TON

Heavy Duty Bossed Hangers

Bucket Lifting Hooks to make moving buckets easier, and helps comply with manual handling regulations

UK Designed and Manufactured

Reinforced Sides for additional wear protection

Added Wear protection to critical wear areas increases bucket life

Heavy Duty replaceable bucket teeth to extend life of bucket

ADDITIONAL SERVICE OPTIONS

All buckets can be fitted with blades welded across the bucket teeth. Grading buckets are available with bolt-on wear edges to give added wear protection to the bucket. All blades are manufactured in house, and can be adapted to your specific requirements.

- We can offer bespoke branding option for buckets if required – Buckets can be branded with the machine manufacturer logo etc
- Buckets can be fleet numbered if required
