

RHINOX[®]
XTREME PERFORMANCE

EXCAVATOR BUCKETS

The Rhinox Bucket range covers buckets for excavators from 13 ton to 30 ton.

We have built on our extensive experience in the plant industry, together with feedback from our customers, to deliver a bucket that is built to work. Using hi-tech CAD imaging software we have worked to optimise strength and durability whilst applying state of the art manufacturing techniques to keep costs as low as possible.

13-30 TON KEY FEATURES ARE

- All buckets supplied with Bolted in Pins
- Heavy Duty Bucket Teeth (with Lifetime guarantee against breakages)
- Heavy Duty wear straps to rear of bucket
- Lip Plate Heat Treated to 400HB for maximum wear resistance
- Extra Wear protection to front edge of bucket for additional wear resistance

EXCAVATOR BUCKETS

13-30 TON

All buckets supplied with bolted in Dummy Pins

UK Designed and Manufactured

Reinforced Sides for additional wear protection

Lifetime guarantee on the welds.

Added Wear protection to critical wear areas increases bucket life

Heavy Duty replaceable bucket teeth to extend life of bucket

ADDITIONAL SERVICE OPTIONS

All buckets can be fitted with blades welded across the bucket teeth. Grading buckets are available with bolt-on wear edges to give added wear protection to the bucket. All blades are manufactured in house, and can be adapted to your specific requirements.

- We can offer bespoke branding option for buckets if required – Buckets can be branded with the machine manufacturer logo etc
- Buckets can be fleet numbered if required
